```

The spanning tree found for HepatitisC data set
```
0.606    4.000    5.000
0.539    3.000    4.000
0.086    0.000    7.000
0.083    1.000    7.000
0.071    1.000    6.000
0.069    1.000    4.000
0.032    7.000    8.000
0.026    0.000    2.000
```
Figure 1: Maximally Weighted Spanning Tree obtained from HepatitisC data set.

2 Maximally Weighted Spanning Tree

See Figure 1 for the maximally weighted spanning tree we obtained. Nodes are coloured blue and indexed from 0 to 8; whilst edges are grey with the dependency between the two nodes connected by the edge written on it.
